

Asus phones - How to fix push notifications?

How to fix the push notifications on Asus phones:

Phones from Asus could have some issues with the incoming call to 2N® Mobile Video application due to the battery savings. Here is the guide how to make it work

Proceed please with following steps:

- Go to settings --> manage battery usage --> choose all apps. From there, pick 2N® Mobile Video and send it to --> Do not optimize
- Go to consumptions--> management of automatic startup --> find 2N® Mobile Video --> enable it
