

# Configuration - Can I use 2N® VoiceBlue Next with my PBX?

2N® VoiceBlue Next uses the protocol SIP for calling. Check if your PBX supports this VoIP protocol.

Below you can find a link to our pages where you can check a document with examples of IP PBX systems. If you can not find your IP PBX, then the important thing is whether your IP PBX uses protocol SIP. This protocol is required by 2N® VoiceBlue Next

Please, go to the following link [Supported PBXs](#) and click on the tab Other.
